

Langafel C of E Primary School Science Principles

Science is best when...

It is practical and fun and all pupils are actively engaged in educationally relevant content.

Activities are differentiated to challenge all pupils who are encouraged to persevere at all opportunities.

Children have an opportunity to develop their teamwork and explore their curriculum.

Natural curiosity is encouraged through the use of a range of stimulating and high-quality resources.

Science is enhanced by embracing opportunities to learn outside the classroom, both within the school grounds and beyond.
